RESEARCH ETHICS GRAND ROUNDS – Biobanks & Databases: Challenges for Research Ethics (& Researchers) **Hank Greely, JD**, Deane F. and Kate Edelman Johnson Professor of Law and Professor, by courtesy, of Genetics at Stanford University. Chairs of the California Advisory Committee on Human Stem Cell Research and the steering committee of the Stanford University Center for Biomedical Ethics, and directs the Stanford Center for Law and the Biosciences. From 2007 to 2010 he was a co-director of the Law and Neuroscience Project. In 2006, he was elected a fellow of the American Association for Advancement of Science.

The growth of both biobanks and, perhaps more importantly, databases rich with health-related information, raises unprecedented opportunities for biomedical research. Those opportunities, though, also raise major challenges for research ethics, research participants, patients, and researchers. This talk will explore some of those challenges.
