UPCOMING LECTURE

Perri Klass, MD - Living to Grow Up:
How Childhood Death Became "Unnatural"

Z. Smith Reynolds Library
Auditorium, Room 404, Reynolda
Campus, Wake Forest University

Wednesday, November 2,
4:00-5:00pm

Professor of Journalism and Pediatrics at New York University and Co-Director of NYU Florence, Dr. Perri Klass is a pediatrician and a prolific author of nonfiction and fiction about the practice of medicine and the people affected by illness and health care. She has written numerous essays and books encompassing medical journalism and creative nonfiction. Her most recent book, *The Best Medicine*, provides an historical perspective on the role of public health in reducing child mortality. Much of Dr. Klass's work addresses perennial questions about physicians, child patients, and the role that medicine, health, and illness play in human relationships and in all our lives. For that reason alone, her writing can be characterized as addressing bioethics - a bioethics that is both broadly accessible and wide in scope.

Attendance is free. Reception to follow.

UPCOMING EVENT

BIOETHICS GRADUATE PROGRAM

The Bioethics Graduate Program at Wake Forest University is now accepting applications for Fall 2023 admissions now through May 31, 2023.

The Bioethics Graduate Program equips graduates to practice, teach, and conduct research about bioethics, and is an excellent complement to other advanced degrees.

For professionals already employed as well as new graduates entering the work force, graduate-level education in bioethics is relevant to a variety of jobs including health administration, clinical care and research, law, and public policy as well as other similar fields. It is attractive to students who have completed pre-health, pre-law, and humanities programs and may continue onto professional schools and/or doctoral programs.

The students in the Bioethics program bring a diversity of academic, employment, and life experiences to the classroom.

The program offers small, highly interactive classes, experiential learning, and a variety of bioethics events, activities, and opportunities. It prioritizes a keen focus on critical reflection, not only about bioethical issues, questions, and problems but also about the nature and scope of the field of bioethics and the roles and responsibilities of those who do bioethics work. It emphasizes personal interaction, promotes scholarly and interpersonal communicative capabilities, and fosters close relationships among students, faculty, and alumni.

The program is committed to providing students with a learning environment that is maximally rich and beneficial, offering a combination of learning modalities.

The small class sizes and versatile curricular options enable students to tailor the program to their individual interests. The program is flexible for both full and part-time study.

The program faculty is nationally recognized in the field of bioethics.

For more information, including program philosophy, course and faculty listings, and application procedures, please contact Vicky Zickmund, (336-716-1499) as well as visit the website.
